PROFESSIONAL EXPERIENCE

Tata Consultancy Services

Performance Test Engineer

Dec 2021 - Present

- Performance Test Engineer with **3+ years** of experience in designing, developing, and optimizing performance testing strategies for enterprise applications like **Salesforce** and **Appian**. Proficient in **JMeter**, **BlazeMeter**, and currently learning **LoadRunner**. Strong expertise in **AWS integrations**, **system optimization**, and performance monitoring with **AppDynamics**. Adept at collaborating with cross-functional teams to ensure high-performance systems and conducting end-to-end testing, including **scalability**, **stress**, and **endurance testing**. Experienced in automating test scripts and integrating them into **CI/CD pipelines** for efficiency.

EDUCATION

Krishna Chaitanya Institute of Science and Technology

MCA - 8.7

July 2019 - Sep 2021

PROJECT

KONE - Performance Test Engineer

Jan 2022

Designed, developed, and executed performance test scripts for **Appian-based workflows** using **JMeter** and **BlazeMeter**.

Conducted **stress**, **scalability**, and **endurance tests** for **AWS integrations**, reducing API latency by **30%** and improving data transfer efficiency.

Monitored system performance with **AppDynamics**, identifying and resolving bottlenecks to enhance throughput by **15%**.

Improved **Appian workflow processing** speed by **25%**, enabling the system to handle **20% more concurrent users** during peak loads.

Led **performance testing for multiple critical Appian applications** across business functions to ensure scalability and reliability.

Appian - Digital Enabling Platform

2022 - present

Appian Performance Testing

- Conducted performance testing for Appian workflows, ensuring scalability and stability under peak load conditions.
- Optimized resource utilization and response times, enhancing workflow performance by **25%**.
- Managed performance testing for multiple critical Appian applications across various business functions, ensuring scalability and reliability through thorough validation and load testing.
- Prepared and presented **weekly and monthly performance testing reports** to stakeholders, highlighting key metrics, findings, and recommendations for all seven applications.
- Presented weekly updates to stakeholders during CAB (Change Advisory Board) calls, providing insights on performance testing progress, key findings, and actionable recommendations for system optimization.
- Conducted performance tests for AWS integrations, identifying bottlenecks and improving overall system performance.

SKILLS

Testing Tools: JMeter, BlazeMeter, LoadRunner (Learning), Gatling

Monitoring Tools: AppDynamics

Platforms: Appian

Cloud: AWS, Azure

Database: SQL Queries, Performance Optimization

Methodologies: SDLC, Agile (Scrum)

Certification: Associate Cloud Engineer (GCP)

Languages: English

Soft Skills: Effective Communication, Stakeholder Collaboration, Problem-Solving
